

Senior React Developer

About the job:

B2M Solutions is growing! We are looking for a competent, enthusiastic, and collaborative developer with React and Node.JS experience to join us in working on our new product suite, an extension of our already successful mobile analytics software.

If you get excited about developing software, are keen to work on a cutting-edge product, and enjoy having input into the end-result then this might be the role for you! We are a company where creativity and learning are highly prized.

These are exciting times for our multi-award-winning business and our amazing teams, as we are ramping up the development of our flagship analytics product, Elemez, and expanding our development team.

You will be working closely with the product team to define and deliver our software in an Agile environment, supporting the development of any or all the following:

- our agent on the mobile device,
- backend analytics processing,
- AI/Machine Learning engine, and
- the user interface.

About you:

You're an experienced and talented full stack developer with solid commercial React experience and skills (and be prepared to demonstrate this at interview), you have a "can-do" attitude and a passion for software development, and a real team player.

You're enthusiastic and motivated, with solid experience in software development in a commercial environment and you get excited about learning new technologies and experimenting. Our current tech stack is Javascript, C#, NodeJS, Python, Angular, AWS, React, TypeScript, GraphQL... and more.

You may have some of these or all of these, or other skills we will be impressed by.

You must have knowledge of/ experience in unit testing, be confident in your technical skills and be happy to challenge others and share your expertise and opinions.

About the company:

We have built a culture based on respect, openness, and collaboration, where everyone who works for us is part of the B2M family. We are a happy and close team, with an emphasis on not only producing excellent software but growing and developing our people from all backgrounds and experiences. We actively support inclusivity and diversity and are proud recipients of a Bronze Award in Mind's Workplace Wellbeing Awards 2020-2021.

Our mission is to deliver outstanding products using the latest technology, in a way that allows every member of our talented team to contribute, learn and enjoy the experience.

Our values:

- Support each other
- Inclusivity
- Collaboration
- Respect
- Honesty and openness
- Learning together

This is a great opportunity to join an evolving and established company that invests in its employees' development, has created a great working environment, and is on target to deliver an exciting product to global corporate clients
