

## **UX Designer**

### **What we are looking for:**

This is an excellent opportunity for someone with a track record in UI/UX design to join a rapidly growing company in a key role.

You will have an in-depth understanding of design principles and a demonstrably strong portfolio of past products and deliverables.

You enjoy working closely with the development and product teams on a daily basis to ensure that the design for new features, capabilities and deliverables is aligned with overall platform strategy, technical dependencies and best practices.

You are able to clearly articulate and defend technical requirements and acceptance criteria in writing, verbally and through excellent presentation skills.

### **Role:**

UX/UI designer reporting to the Head of Product Management.

- Designing new, user-friendly features for the Elemen analytics platform
- Liaise closely with key stakeholders, including end-users, to identify, design, specify and incorporate new features of high value into the product;
- Working closely with the development team to deliver features that match your designs
- Highlight areas of improvement in the product and design solutions for them
- Working with the Product Manager and Product Owner to prioritise work
- Utilising and developing the Elemen component library

### **Requirements:**

- A strong portfolio demonstrating deliverables and products you've worked on
- A strong understanding of design principles covering Accessibility, Usability, Visual Design, Interaction Design
- Experience creating wireframes, interactive prototypes and high-fidelity mockups
- Experience using Figma, Sketch, InVision or similar
- 3+ years as a UI/UX designer in a technology-focused work environment

### **Bonus**

- Experience working on complex, responsive web applications
- Experience creating data visualisations
- Understanding of HTML & CSS
- Experience working within an Agile CI/CD environment
- A degree or qualification relevant to UI/UX design (e.g. Human-Computer Interaction)
